

Environmental Quality Management, Inc.

Environmental, Health, Safety and Security Auditing

Cost-effective and thorough compliance with state and federal regulations is essential in today's competitive environment. EQ has over 20 years of experience assisting organizations with compliance by providing Environmental, Health, Safety and Security Auditing (EHS&S) consulting services for commercial, industrial, and government facilities throughout North America. Our professionals have both the in-plant experience and necessary professional training to evaluate and provide feasible solutions to an organization's EHS&S compliance requirements. EQ professionals work with clients to develop site-specific and organization-wide systems to establish and maintain an internal culture of compliance.

Our EHS&S auditing services assist clients in the evaluation of their current compliance status and identify potential liabilities and associated risks. EQ professionals focus on identifying areas of non-compliance and/or best management practices and recommend viable and cost-effective solutions or alternatives.

In addition to federal and state regulations and internal policies and procedures, our EHS&S audits can incorporate the development and implementation of the following:

Department of Homeland Security Assessments and Planning:

- ▶ Chemical Terrorism Vulnerability assessment and permitting
- ▶ Biological and Chemical Hazard Assessments
- ▶ Emergency Preparedness
- ▶ Decontamination
- ▶ Security Assessments

Health, Safety, and Industrial Hygiene Programs that Incorporate a Hazard and Safety Analysis of the Facility and Manufacturing Process, including:

- ▶ Risk assessment and environmental health & safety
- ▶ Worker exposure assessment and modeling
- ▶ Industrial hygiene monitoring & programs
- ▶ Indoor air quality surveys
- ▶ OSHA Voluntary Protection Program (VPP) implementations
- ▶ Job Safety Analysis development
- ▶ Chemical Hygiene Plans
- ▶ Hazardous Communication Training
- ▶ OSHA Chemical Specific Safety Planning

Servicing Multiple Industries:

- ▶ Chemical
- ▶ Food and Beverage
- ▶ Pharmaceuticals
- ▶ Aerospace
- ▶ Steel and Coke
- ▶ Petroleum
- ▶ Cement
- ▶ Automotive
- ▶ Fertilizer and Lawn Care
- ▶ Pulp and Paper
- ▶ Electric Utilities

Solving Problems... Creating Cost-Effective, Sustainable Solutions!

Environmental Health and Management Systems and ISO 14001 Certification, to:

- ▶ Identify, assess and track the environmental health and safety impacts of operations
- ▶ Identify and evaluate the federal, state and local regulations that apply to a facility and its vendors
- ▶ Define key responsibilities of personnel
- ▶ Evaluate environmental performance
- ▶ Support programs and compliance
- ▶ Develop a continuous improvement auditing program

Environmental Systems and Programs Permitting Compliance Support, including:

- ▶ RCRA/hazardous waste permitting, planning and mitigation
- ▶ NPDES permitting
- ▶ Air permitting, modeling, testing and systems management
- ▶ Water/Wastewater [Total Maximum Daily Load (TMDL)] system analysis & engineering
- ▶ Pollution Prevention Planning
- ▶ SPCC planning and permitting
- ▶ Stormwater permitting and discharge compliance
